

Composting Is Cool!

Last school year CPS kids kept 60 tons of food scraps out of the landfill/incinerator!

These composting efforts saved

- 60 Tons of Greenhouse Gases
- 16 Truck Loads of Trash

The food scraps were turned into awesome soil to grow food and flowers!

Thank you!

Did You Know?

This fall, curbside collection of food scraps is coming to the Monday collection route! (All residential buildings with 12 or fewer units that get their trash picked up by the City will be given bins to participate.)

Recycling Rocks!

Last school year CPS students, staff and teachers recycled 383 tons of containers, paper and cardboard!

These CPS recycling efforts saved:

- 5,778 Trees
- 767 Barrels of Oil
- 268 Households' Worth of Electricity Use
- 2.68 Million Gallons of Water
- 51 Truck Loads of Trash

These efforts also prevented 665 tons of carbon dioxide from being released, and prevented the creation of methane in the landfill.

Let's recycle even more this year!
